Trading

Markets.

A privately held, multi-sector investment and development group with a twenty-year track record across Pakistan, Malaysia & Turkey.

Vantage Group Developments is a privately held, multi-sector investment and development group with a twenty-year track record of creating institutional-grade real estate, industrial infrastructure, and global trading operations across Pakistan, Malaysia, and Turkey.

Founded by Chairman **Omer Farooq Kayani**, the Group operates through Vantage Developers Pvt. Ltd. (VDL) — headquartered in Islamabad, Pakistan's federal capital — deploying capital and expertise across five distinct verticals from four international offices.

The mandate is disciplined in ambition: identify structural opportunity across real estate cycles, industrial gaps, critical-minerals markets, and global commodity flows — and convert that intelligence into lasting, compounding assets.

The Chairman's positioning — *"I create assets and trade global markets"* — captures the dual mandate driving returns: hard-asset creation combined with an active global trading book.

The Group now sits at the intersection of three transformational themes: Pakistan's industrial modernisation, the global critical-minerals supercycle, and the acceleration of cross-border chemical and commodity trade through Turkey and Southeast Asia.

GROUP DIVISIONS

01 · B2C VantageTown REAL ESTATE Premium master-planned residential communities. Curated lifestyles, long-term capital appreciation, institutional-quality development for homebuyers and NRP investors.	02 · B2B VantEdge Parks INDUSTRIAL REAL ESTATE Grade-A industrial parks with WorkNest™ workforce residences across Pakistan's high-growth corridors. The category-defining response to a Grade-A deficit.	03 · GLOBAL RareOres MINERAL INTELLIGENCE Pakistan's first institutional-grade mineral intelligence, sourcing and trading platform — bridging a \$6T+ endowment to global industrial demand across 40+ countries.	04 · MULTI-MARKET Vantage Exports CHEMICAL COMMODITIES Multi-product industrial chemical trading with operations in Turkey, Pakistan and South Africa. Six core products. \$2.5M Year-1 revenue target.	05 · PROP-DESK Global Markets PROPRIETARY TRADING Active proprietary book in physical commodities, equities and digital assets. Anchored from Istanbul — the bridge between European markets, GCC capital and South Asian growth.

§ 02

A DIRECT COMMUNICATION

From the desk of the *Chairman*.

The Vantage Group was built on a conviction that still holds: Pakistan's transformation into a multi-trillion-dollar economy is not a question of *whether* — it is a question of *when*. Those who build the right assets, in the right structures, positioned on the right themes today will disproportionately capture that transformation.

Since our establishment we have delivered across residential communities, government defence infrastructure, diplomatic facilities, and institutional mandates. We built with DHA. We built for the Pakistan Air Force. We built for the Royal Embassy of the Kingdom of Saudi Arabia. Our track record is concrete, verifiable, and public — not a prospectus claim.

We are now entering a more ambitious chapter. **VantEdge Parks** brings institutional-grade industrial real estate to Pakistani markets that have never seen it. **RareOres** positions the Group as Pakistan's first institutional mineral-intelligence platform at the precise moment the world is racing for critical minerals. **Vantage Exports** is building a multi-product chemical trading operation spanning Turkey, Pakistan and South Africa — three markets, six products, exponential margins.

Our Malaysia office in Johor Bahru is an operational choice, not a symbol. Johor sits at the gateway of Southeast Asian capital flows, adjacent to Singapore's financial infrastructure and ASEAN's most dynamic growth corridor. It gives the Group a permanent foothold in Asia's most important emerging investment zone.

We are selective about who we build with. We do not seek volume of capital — we seek alignment of vision. The investors who work with Vantage will find a group that executes precisely what it proposes, communicates with directness, and compounds returns across multiple asset classes and geographies simultaneously.

I create assets and trade global markets. Everything Vantage builds serves that singular mission.

Omer Farooq Kayani

INDUSTRIAL REAL ESTATE

VantEdge
Parks

GRADE-A INDUSTRIAL INFRASTRUCTURE
• WORKNEST™ WORKFORCE RESIDENCES
• VANTEDGE.COM

Vantage Group's institutional industrial real-estate platform — engineered to fill the structural void in Pakistan's manufacturing and logistics landscape: the near-total absence of Grade-A, purpose-built industrial infrastructure to global standards.

PARK SPECIFICATION

BAY SIZE	10,000 – 50,000 sq.ft.
EAVE CLEARANCE	9 – 12 metres
POWER	Three-phase industrial
REVENUE MODEL	Triple Net Lease • VPMC managed
ENTRY LEVEL	PKR 32 Lakhs (WorkNest T1)
TARGET ZONES	Punjab & KPK Corridors
MANAGEMENT	100% VPMC — Passive Investor

MARKET OPPORTUNITY

Pakistan's SEZ and industrial-policy cycle is at a structural inflection. CPEC infrastructure has matured. Foreign manufacturing interest — textiles, pharmaceuticals, logistics, consumer goods — is compounding. The supply of Grade-A industrial real estate in Pakistan's secondary markets is effectively zero.

VantEdge is building the category-defining response before the window closes — and intends to become the dominant institutional industrial real-estate operator across Pakistan's top six industrial corridors by 2030.

WORKNEST™ WORKFORCE RESIDENCE COMPOUND

A structural moat. By co-locating workforce residences with warehouse infrastructure on a single compound, VantEdge eliminates the industrial employer's core headache — workforce proximity and daily attrition. No competing product exists at this standard in Pakistan's secondary industrial markets.

TIER 1 PKR 32L Studio • Entry	TIER 2 PKR 44L 1 BR Compact	TIER 3 PKR 55L 1 BR Premium	TIER 4 PKR 67L 2 BR Family
---	---	---	--

INVESTOR MECHANIC Passive income on workforce residences. VPMC-managed. Triple-Net Lease structure. Entry from PKR 32L. Investor performs zero operational management.

RareOres.

PAKISTAN'S NO.1 MINERAL INTELLIGENCE PLATFORM · RAREORES.COM

A specialist mineral intelligence, sourcing and trading platform purpose-built for the critical-minerals supercycle. Pakistan holds an estimated **\$6 trillion+** in mineral endowment — yet remains almost entirely unexploited due to absent institutional infrastructure between the geological asset and the global buyer.

§ 09

INVESTMENT THESIS

Why *Vantage*. Why 2025.

Six structural reasons. One coordinated strategy. A Group built for compounding across asset classes and geographies — simultaneously.

01

Pakistan's Infrastructure Gap is the Arbitrage

The deficit of Grade-A industrial real estate, workforce housing and institutional logistics in Pakistan is not a risk — it is the return. First movers with execution capability command pricing premiums that evaporate once the category matures. VantEdge is building the category before the window closes.

02

The Critical-Minerals Supercycle is Now

The energy transition requires copper, lithium, cobalt and rare earths at historically unprecedented industrial scale. Pakistan holds \$6T+ in proven mineral endowment with near-zero institutional exploitation. RareOres is positioned to be the bridge — before the global majors arrive and absorb the economics.

03

Chemical Arbitrage Across Three Continents

Turkey imports 43,000 MT of DCM per year with zero domestic production. South Africa imports 12,000 MT of chloroform with no Asian supplier dominant. Pakistan's methanol demand exceeds 120,000 MT. Vantage Exports captures 25–65% margin connecting supply to structural demand gaps.

04

A Track Record That Cannot Be Fabricated

Defence installations. Diplomatic facilities. Institutional campuses. DHA partnerships. Twenty years. Zero failed deliveries. This is not a prospectus claim — it is a verifiable, public history of complex mandate execution. VantEdge and RareOres are not first projects; they are the next chapter.

05

Asset Creation & Trading Compound Each Other

The Group's dual mandate — creating hard assets while running an active global trading book — generates multiple simultaneous return streams. Real-estate appreciation, rental yield, mineral royalties, chemical trading margins and proprietary commodity positions are additive, not alternatives.

06

Four Geographies. One Coordinated Strategy.

Lahore (asset creation, construction), Islamabad (government access, policy), Johor Bahru (ASEAN capital, Labuan licence), Istanbul (commodity trading, chemical distribution). Each office amplifies the others. No single-market dependency. Multi-geography compounding is structural — not accidental.

"I create assets and trade global markets."

OMER FAROOQ KAYANI • CHAIRMAN & FOUNDER

CLOSING
